THE PROJECT

67 units of student housing. The building is organized as a lineal block and a body attached. The smaller body consists of 5 modules with common areas (events, study and living) as well as the main entrance to the building. The other building is formed from 70 industrialized modules, 67 of which are used for housing.

This Project leaves aside all superficial aspects and focuses on those considered essential, such as sustainability, industrialization, lightweight construction, functionality and shortening time of the construction.
